Chronic hyperpigmented FDE plaque

The diagram illustrates a chronic hyperpigmented FDE plaque. A large, dark brown, circular area represents the plaque. A dashed red line divides the plaque into two regions: 'Lesional' on the left and 'Perilesional' on the right. Within the 'Lesional' region, there are two circular areas labeled 'Drug' and 'Control'. Within the 'Perilesional' region, there are two circular areas labeled 'Drug' and 'Control'. The 'Drug' labels are in orange, and the 'Control' labels are in red. The background is a light brown color.
