

Read at 48h (remove patches), confirm at 72–96h

No reaction

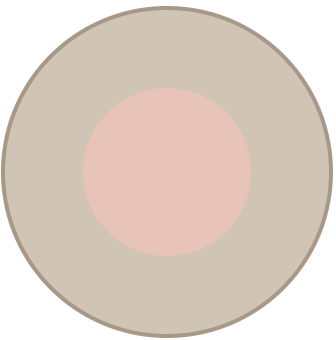

Severe

—
Negative

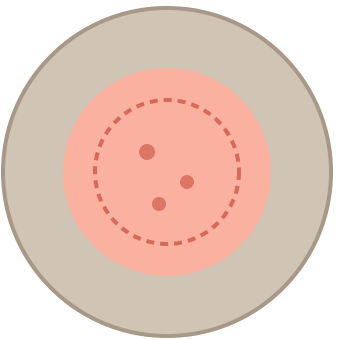

No reaction

?+
Doubtful

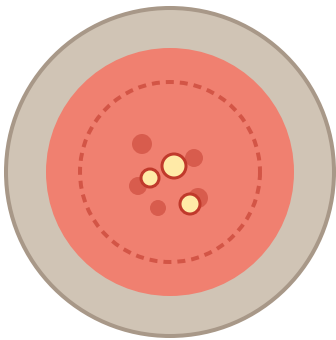

Faint erythema
No infiltration

+
Weak positive

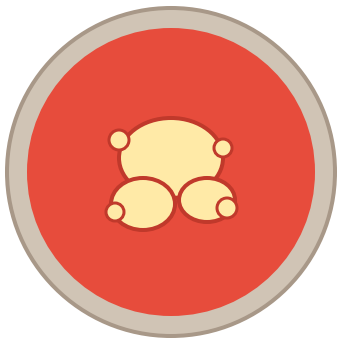

Erythema
Infiltration
± papules

++
Strong positive

Erythema, infiltration
Papules
Vesicles

+++
Extreme

Intense erythema
Coalescing vesicles
or bullous

Non-allergic

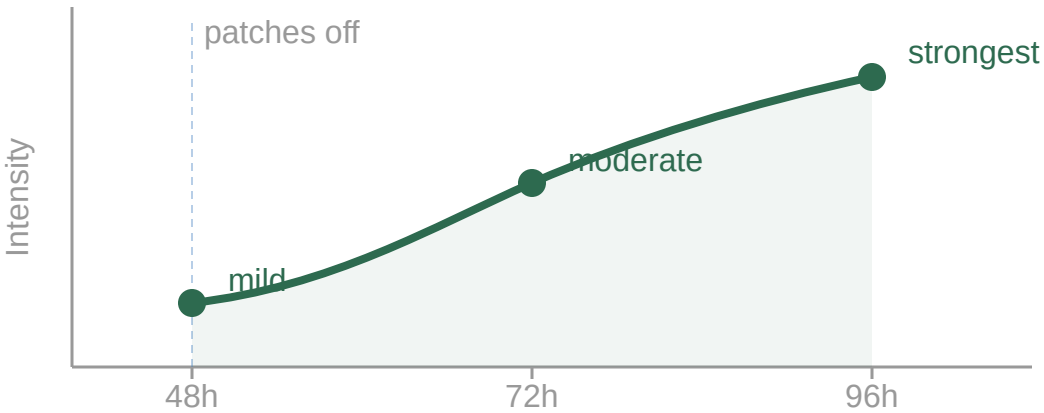

– and ?+

Allergic

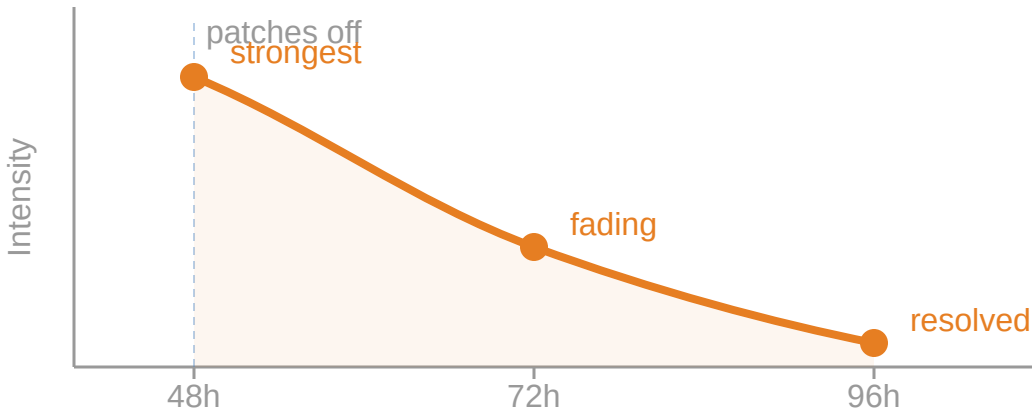

+, ++, +++ — requires palpable infiltration

Temporal Pattern: Distinguishing True Allergy from Irritant

True Allergic — Crescendo ↗

Irritant — Decrescendo ↘

ICDRG grading. Key distinction: palpable infiltration separates true positive from doubtful/irritant. For drug patch testing: read at 48h, 72h, and 96h (or Day 7). Late positives common with drugs.
