

Complement-Dependent Cytotoxicity (CDC) Assay

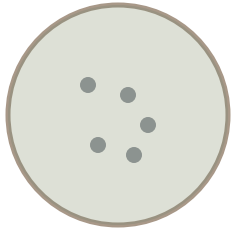

Serologic typing → Field 1 (antigen group)

1 Patient lymphocytes

2 Add typing antisera

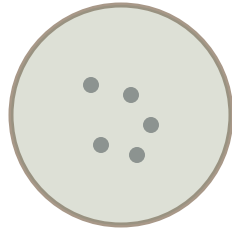

3 Add complement + dye

Anti-B7

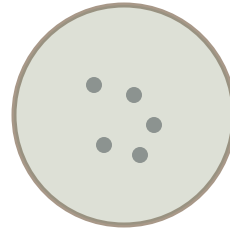

—
Alive

Anti-B27

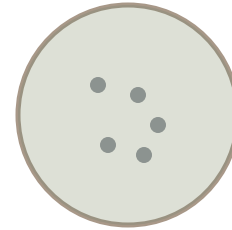

—
Alive

Anti-B44

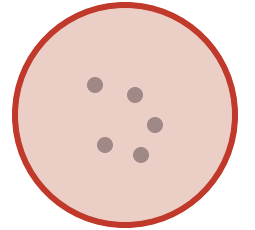

—
Alive

Anti-B57

—
Alive

Anti-B58

+
Dead

Patient is **B58** → Field 1 resolved

HLA-B***58**:__

Antibodies define antigen group but cannot distinguish alleles within a group
